

MOBILE COUNTERWEIGHT PYLON-SYSTEM FOR MONITORS FROM 65-86"

MANUALLY HEIGHT ADJUSTABLE WITH 2 WHITEBOARD WINGS

PRODUCT

This mobile, manually height-adjustable counterweight system for monitors is compatible with all touchscreen displays available on the market, from 65" to 86" screens.

The display bracket slides between the two pylons so that the height of the display can be adjusted manually. It is held in place due to the counterweights on the back of the system. This ensures that every user can work and present at the ergonomically best height.

The two whiteboard wings enable digital and analog working with this system. Both sides of the 2 whiteboard wings can be written on with whiteboard markers, they are dry wipeable and magnetic.

The stable H-mobile base with 4 heavy duty castors (2 of which can be locked) enables the unit to be easily moved from room to room.

Accessories

Keyboard shelf
